Assignment - 1

The following test case is to be executed to perform the Unit Testing activities.

Test Case 1: Grade within range
Test Case scope: Check the grade must be between 0 to 100

Test Procedure:
Login as a professor in the system
Create a new assignment
Enter a grade of -1 for the assignment for a student
Save the entry

Success/Failure Criteria:
Success: the system allow the grade to be saved between 0 to 100.
Failure: the system does not allow the boundary test cases like -1

Provide 5(3 positive and 2 boundary test cases) simple Unit test cases manually(like in lab1)examples for above scenario in tabular form?

NOTE: Cover boundary cases as well
